AVANTech Awarded Hanford Groundwater Treatment System

AVANTech, Inc. has received a purchase order to deliver two ion exchange systems for CH2MHill Hanford. Avantech is designing and manufacturing two 400 gallon per minute systems that will remove Technetium-99 (Tc-99) from contaminated groundwater on the Department of Energy (DOE) Hanford site. This system will also adsorb carbon tetrachloride, which is present as a contaminant in the groundwater. "We are proud to deliver a system that will improve the ability of the DOE to perform groundwater treatment. Our diverse skill sets enable us to bring a commercial approach to governmental and nuclear clients. This approach is cost and schedule efficient " stated AVANTech President Jim Braun.

AVANTech is a design-build company with a commitment to providing service second to none! AVANTech was founded in 1999 and has expanded its business by applying the exceptional talents of its technical team. AVANTech's approach to facility integration makes us uniquely qualified to provide turnkey services. Our personnel have extensive experience in the planning, design, manufacturing and operation of water-treatment systems for industrial and government clients. AVANTech technologies have enabled facilities to establish zero liquid discharge operations by completely recycling all of their wastewater.
