AVANTech Awarded RO System Upgrade and New RO Installation for Johnson Controls Inc.

AVANTech, Inc. has received and completed a purchase order for the design and manufacturing of an RO system upgrade for Johnson Controls at the University of South Carolina. Avantech designed and manufactured a booster pump and modified the current process design to accommodate changes desired to optimize the 130 gpm reverse osmosis system. This work was done in less than two weeks in support of the start-up of the facility. Avantech continues to support the start-up with PLC, process, and mechanical modifications to optimize the facility.

As a result of our responsiveness we have been awarded a follow up work scope at another facility in Oak Ridge Tennessee. This new installation includes two (2) 200 gpm reverse osmosis systems along with two (2) 20 gpm reverse osmosis systems. "Our ability to respond immediately to this clients needs is a direct reflection of commitment to customer service. Our motto is Service Second to None and our attitude everyday reflects this approach to business. We are proud of our history of clients providing us repeat business" stated AVANTech President Jim Braun.

AVANTech is a design-build company with a commitment to providing service second to none! AVANTech was founded in 1999 and has expanded its business by applying the exceptional talents of its technical team. AVANTech's approach to facility integration makes us uniquely qualified to provide turnkey services. Our personnel have extensive experience in the planning, design, manufacturing and operation of water-treatment systems for industrial and government clients. AVANTech technologies have enabled facilities to establish zero liquid discharge operations by completely recycling all of their wastewater.
