## **AVANTech Awarded Qatar Reverse Osmosis Project**

AVANTech, Inc. has received a purchase order for the delivery of two standardized reverse osmosis units from Qatar International Trading Co. The demineralized water system will consist of a particulate filter, activated carbon filter, reverse osmosis system, associated valves, piping, instrumentation, pumps, equipment, and other components. The system design, engineering, and fabrication will be validated with a full system test at AVANTech's manufacturing facility prior to site delivery. AVANTech personnel will also provide installation support working with CH2MHill in Qatar. "Our standard products are an excellent and cost effective solution for many client applications. This award shows our ability to deliver pre-engineered equipment for a wide range of clients. Our product diversity continues to grow and ensure we can support all of our water treatment customers," stated AVANTech President Jim Braun.

AVANTech is a design-build company with a commitment to providing service second to none! AVANTech was founded in 1999 and has expanded its business by applying the exceptional talents of its technical team. AVANTech's approach to facility integration makes us uniquely qualified to provide turnkey services. Our personnel have extensive experience in the planning, design, manufacturing and operation of water-treatment systems for industrial and government clients. AVANTech technologies have enabled facilities to establish zero liquid discharge operations by completely recycling all of their wastewater.
