## **AVANTech Awarded Radioactive Mobile Treatment System in China**

AVANTech, Inc. has received a purchase order from Hansa, a subsidiary of Westinghouse, to design and manufacture a mobile radioactive waste treatment system in support of the construction of the Sanmen Nuclear Power Plant in China. Avantech is designing and manufacturing a treatment system with cartridge and deep bed filtration, ion exchange, reverse osmosis, cation and anion exchange. The system is contained in a twenty foot seavan and is fully automated to minimize operator dose and maintenance. "This project is a complex integration of equipment designed into a simple user interface for protecting the safety of the operator. We are excited to be part of the nuclear development on-going throughout the world and look forward to providing custom solutions for our nuclear clients." stated AVANTech President Jim Braun.

AVANTech is a design-build company with a commitment to providing service second to none! AVANTech was founded in 1999 and has expanded its business by applying the exceptional talents of its technical team. AVANTech's approach to facility integration makes us uniquely qualified to provide turnkey services. Our personnel have extensive experience in the planning, design, manufacturing and operation of water-treatment systems for industrial and government clients. AVANTech technologies have enabled facilities to establish zero liquid discharge operations by completely recycling all of their wastewater.
